## Molecular Imprinting: Principles and Applications of Micro- and Nanostructure Polymers

Molecular imprinting is one of the most efficient methods to fabricate functional polymer structures with pre-defined molecular recognition selectivity. Molecularly imprinted polymers (MIPs) have been used as antibody and enzyme mimics in a large number of applications. The outstanding stability and straightforward preparation make MIPs ideal substitutes for biologically derived molecular recognition materials, especially for development of affinity separation systems, chemical sensors and high selectivity catalysts. New MIP materials are being increasingly applied to solve challenging problems in environmental sciences, food safety control, biotechnology and medical diagnostics.

Development in molecular imprinting research over the past decade has enabled tailor-designed molecular recognition sites to be created in synthetic materials with physical dimensions in the micro- and nano-regime. The new breakthroughs in MIP synthesis/fabrication have brought in many unprecedented functions of the micro- and nano-structured polymers. The aim of this review volume is to introduce to the readers the new developments in molecularly imprinted micro- and nano-structures, and the new applications that have been made possible with the new generation of imprinted materials.

### **From reader reviews:**

#### **Richard Sims:**

Reading a e-book can be one of a lot of task that everyone in the world adores. Do you like reading book and so. There are a lot of reasons why people love it. First reading a book will give you a lot of new information. When you read a guide you will get new information because book is one of numerous ways to share the information or perhaps their idea. Second, reading through a book will make a person more imaginative. When you reading a book especially hype book the author will bring you to definitely imagine the story how the personas do it anything. Third, you are able to share your knowledge to other people. When you read this Molecular Imprinting: Principles and Applications of Micro- and Nanostructure Polymers, it is possible to tells your family, friends and also soon about yours guide. Your knowledge can inspire average, make them reading a book.

#### **Reginald Hunter:**

The book Molecular Imprinting: Principles and Applications of Micro- and Nanostructure Polymers has a lot associated with on it. So when you make sure to read this book you can get a lot of profit. The book was compiled by the very famous author. The author makes some research previous to write this book. This book very easy to read you can obtain the point easily after reading this article book.

#### **Todd Pfeifer:**

In this time globalization it is important to someone to obtain information. The information will make professionals understand the condition of the world. The fitness of the world makes the information better to share. You can find a lot of referrals to get information example: internet, newspaper, book, and soon. You will see that now, a lot of publisher which print many kinds of book. Often the book that recommended to your account is Molecular Imprinting: Principles and Applications of Micro- and Nanostructure Polymers this reserve consist a lot of the information on the condition of this world now. This particular book was represented how can the world has grown up. The terminology styles that writer make usage of to explain it is easy to understand. The writer made some research when he makes this book. That's why this book suited all of you.

#### **Gail Tate:**

Many people spending their time frame by playing outside with friends, fun activity with family or just watching TV 24 hours a day. You can have new activity to spend your whole day by reading through a book. Ugh, you think reading a book can actually hard because you have to take the book everywhere? It ok you can have the e-book, taking everywhere you want in your Smartphone. Like Molecular Imprinting: Principles and Applications of Micro- and Nanostructure Polymers which is obtaining the e-book version. So , try out this book? Let's observe.
