"An excellent introduction to the study of population and its significance for many of the key social, political, cultural and environmental issues facing the world today. It covers population growth, ageing, migration and mobility, parenting, health inequalities, and much more... The authors do not shy away from areas of continuing debate, providing both sides of an argument and encouraging readers to follow up the original sources"

**- Tony Champion, Emeritus Professor of Population Geography, Centre for Urban, Regional & Development Studies, Newcastle University and Vice President, British Society for Population Studies, 2011-2013**
