Current Challenges in Patent Information Retrieval: 29 (The Information Retrieval Series)

Current Challenges in Patent Information Retrieval: 29 (The Information Retrieval Series)

Current Challenges in Patent Information Retrieval: 29 (The Information Retrieval Series)

Patents form an important knowledge resource –much technical information represented in patents is not represented in scientific literature – and at the same time they are important, and economically highly relevant, legal documents. Between 1998 and 2008, the number of patent applications filed yearly worldwide grew by more than 50 percent. Yet still we see a huge gap between, on the one hand, the technologies that emerged from research labs and are in use in major Internet search engines or in enterprise search systems, and, on the other hand, the systems used daily by the patent search communities.

In the past few years, the editors have organized a series of events at the Information Retrieval Facility in Vienna, Austria, bringing together leading researchers in information retrieval (IR) and those who practice and use patent search, thus establishing an interdisciplinary dialogue between the IR and the intellectual property (IP) communities and creating a discursive as well as empirical space for sustainable discussion and innovation. This book is among the results of that joint effort. Many of the chapters were written jointly by IP and IR experts, while all chapters were reviewed by representatives of both communities, resulting in contributions that foster the proliferation and exchange of knowledge across fields and disciplinary mindsets.

Reflecting the efforts and views of both sides of the emerging patent search research and innovation community, this is a carefully selected, organized introduction to what has been achieved, and perhaps even more significantly to what remains to be achieved. The book is a valuable resource for IR researchers and IP professionals who are looking for a comprehensive overview of the state of the art in this domain.

From reader reviews:

Robert Prather:

In this 21st one hundred year, people become competitive in every way. By being competitive at this point, people have do something to make all of them survives, being in the middle of often the crowded place and notice by means of surrounding. One thing that occasionally many people have underestimated the item for a while is reading. Yeah, by reading a publication your ability to survive improve then having chance to stay than other is high. To suit your needs who want to start reading a book, we give you this Current Challenges in Patent Information Retrieval: 29 (The Information Retrieval Series) book as basic and daily reading e-book. Why, because this book is usually more than just a book.

Patsy Phan:

The knowledge that you get from Current Challenges in Patent Information Retrieval: 29 (The Information Retrieval Series) is the more deep you excavating the information that hide within the words the more you get interested in reading it. It does not mean that this book is hard to comprehend but Current Challenges in Patent Information Retrieval: 29 (The Information Retrieval Series) giving you excitement feeling of reading. The article writer conveys their point in specific way that can be understood by anyone who read that because the author of this guide is well-known enough. This book also makes your current vocabulary increase well. So it is easy to understand then can go along with you, both in printed or e-book style are available. We recommend you for having this particular Current Challenges in Patent Information Retrieval: 29 (The Information Retrieval Series) instantly.

Herbert Mikula:

This book untitled Current Challenges in Patent Information Retrieval: 29 (The Information Retrieval Series) to be one of several books that best seller in this year, honestly, that is because when you read this guide you can get a lot of benefit in it. You will easily to buy this specific book in the book retailer or you can order it through online. The publisher with this book sells the e-book too. It makes you easier to read this book, since you can read this book in your Cell phone. So there is no reason to you to past this book from your list.

Kim Nielsen:

People live in this new moment of lifestyle always attempt to and must have the extra time or they will get lot of stress from both everyday life and work. So , if we ask do people have time, we will say absolutely sure. People is human not just a robot. Then we question again, what kind of activity have you got when the spare time coming to a person of course your answer can unlimited right. Then ever try this one, reading publications. It can be your alternative within spending your spare time, the book you have read will be Current Challenges in Patent Information Retrieval: 29 (The Information Retrieval Series).
