Landsat and Beyond: Sustaining and Enhancing the Nation's Land Imaging Program Committee on Implementation of a Sustained Land Imaging Program, Space Studies Board, Division on Engineering and Physical Sciences, National Research Council

In 1972 NASA launched the Earth Resources Technology Satellite (ERTS), now known as Landsat 1, and on February 11, 2013 launched Landsat 8. Currently the United States has collected 40 continuous years of satellite records of land remote sensing data from satellites similar to these. Even though this data is valuable to improving many different aspects of the country such as agriculture, homeland security, and disaster mitigation; the availability of this data for planning our nation's future is at risk.

Thus, the Department of the Interior's (DOI's) U.S. Geological Survey (USGS) requested that the National Research Council's (NRC's) Committee on Implementation of a Sustained Land Imaging Program review the needs and opportunities necessary for the development of a national space-based operational land imaging capability. The committee was specifically tasked with several objectives including identifying stakeholders and their data needs and providing recommendations to facilitate the transition from NASA's research-based series of satellites to a sustained USGS land imaging program.

Landsat and Beyond: Sustaining and Enhancing the Nation's Land Imaging Program is the result of the committee's investigation. This investigation included meetings with stakeholders such as the DOI, NASA, NOAA, and commercial data providers. The report includes the committee's recommendations, information about different aspects of the program, and a section dedicated to future opportunities.

From reader reviews:

Darlene Johnson:

Book will be written, printed, or outlined for everything. You can know everything you want by a book. Book has a different type. We all know that that book is important issue to bring us around the world. Close to that you can your reading proficiency was fluently. A reserve Landsat and Beyond: Sustaining and Enhancing the Nation's Land Imaging Program will make you to become smarter. You can feel considerably more confidence if you can know about almost everything. But some of you think this open or reading a new book make you bored. It is not make you fun. Why they might be thought like that? Have you seeking best book or suitable book with you?

Chad Jones:

The book Landsat and Beyond: Sustaining and Enhancing the Nation's Land Imaging Program can give more knowledge and also the precise product information about everything you want. So why must we leave the great thing like a book Landsat and Beyond: Sustaining and Enhancing the Nation's Land Imaging Program? A few of you have a different opinion about book. But one aim this book can give many info for us. It is absolutely correct. Right now, try to closer using your book. Knowledge or information that you take for that, you could give for each other; you are able to share all of these. Book Landsat and Beyond: Sustaining and Enhancing the Nation's Land Imaging Program has simple shape however, you know: it has great and big function for you. You can seem the enormous world by available and read a book. So it is very wonderful.

Kelly Brooks:

Reading a book to be new life style in this season; every people loves to go through a book. When you read a book you can get a great deal of benefit. When you read publications, you can improve your knowledge, mainly because book has a lot of information upon it. The information that you will get depend on what kinds of book that you have read. If you need to get information about your review, you can read education books, but if you act like you want to entertain yourself read a fiction books, these kinds of us novel, comics, as well as soon. The Landsat and Beyond: Sustaining and Enhancing the Nation's Land Imaging Program offer you a new experience in reading a book.

Cara Shaver:

Reading a book make you to get more knowledge from this. You can take knowledge and information from the book. Book is published or printed or created from each source this filled update of news. On this modern era like today, many ways to get information are available for anyone. From media social just like newspaper, magazines, science guide, encyclopedia, reference book, new and comic. You can add your knowledge by that book. Isn't it time to spend your spare time to spread out your book? Or just looking for
