## Lipid Mediators (Handbook of Immunopharmacology)

The Handbook of Immunopharmacology: Lipid Mediators covers a comprehensive overview of lipid mediators, from synthesis through to inhibition. The book discusses the metabolism of arachidonic acid; the measurement of fatty acids and their metabolites; and the biological properties of cyclooxygenase products. The text also describes other essential fatty acids, their metabolites and cell-cell interactions; the inhibitors of fatty acid-derived mediators; as well as the biosynthesis and catabolism of platelet-activating factor. The cellular sources of platelet-activating factor and related lipids; the biological properties of platelet-activating factor; and the effects of platelet-activating factor receptor antagonists are also considered.

Immunopharmacologists, immunologists, and pharmacologists will find the book invaluable.
