60 Minute: Scrum Stewart Lancaster

Scrum is a project management approach based on Agile principles that allows organisations and individuals to deliver the highest possible value in the shortest possible time. This framework has often been met with adversity as it is a departure to traditional methods, but has stood the test of time and has demonstrated through countless organisations that they are able to deliver more with less.

60 Minute: Scrum uses a number of cutting edge techniques to ensure that you are to both immediately apply the Scrum framework, and to recall the methodology for years to come.
