How should courts interpret the law? While all agree that courts must be objective, people differ sharply over what this demands in practice: fidelity to the text? To the will of the people? To certain moral ideals? In *Judicial Review in an Objective Legal System*, Tara Smith breaks through the false dichotomies inherent in dominant theories - various forms of originalism, living constitutionalism, and minimalism - to present a new approach to judicial review. She contends that we cannot assess judicial review in isolation from the larger enterprise of which it is a part. By providing careful clarification of both the function of the legal system as well as of objectivity itself, she produces a compelling, firmly grounded account of genuinely objective judicial review. Smith's innovative approach marks a welcome advance for anyone interested in legal objectivity and individual rights.
