Modeling Users' Experiences with Interactive Systems (Studies in Computational Intelligence)

Evangelos Karapanos

Over the past decade the field of Human-Computer Interaction has evolved from the study of the usability of interactive products towards a more holistic understanding of how they may mediate desired human experiences.

This book identifies the notion of diversity in users' experiences with interactive products and proposes methods and tools for modeling this along two levels: (a) interpersonal diversity in users' responses to early conceptual designs, and (b) the dynamics of users' experiences over time.

The Repertory Grid Technique is proposed as an alternative to standardized psychometric scales for modeling interpersonal diversity in users' responses to early concepts in the design process, and new Multi-Dimensional Scaling procedures are introduced for modeling such complex quantitative data.

iScale, a tool for the retrospective assessment of users' experiences over time is proposed as an alternative to longitudinal field studies, and a semi-automated technique for the analysis of the elicited experience narratives is introduced.

Through these two methodological contributions, this book argues against averaging in the subjective evaluation of interactive products. It proposes the development of interactive tools that can assist designers in moving across multiple levels of abstraction of empirical data, as design-relevant knowledge might be found on all these levels.

Foreword by Jean-Bernard Martens and Closing Note by Marc Hassenzahl.

From reader reviews:

Christopher Jones:

Book will be written, printed, or outlined for everything. You can recognize everything you want by a book. Book has a different type. We all know that that book is important factor to bring us around the world. Next to that you can your reading skill was fluently. A e-book Modeling Users' Experiences with Interactive Systems (Studies in Computational Intelligence) will make you to always be smarter. You can feel much more confidence if you can know about everything. But some of you think this open or reading a new book make you bored. It is not make you fun. Why they could be thought like that? Have you in search of best book or appropriate book with you?

Ollie Johnson:

Playing with family inside a park, coming to see the water world or hanging out with close friends is thing that usually you could have done when you have spare time, after that why you don't try matter that really opposite from that. One activity that make you not sense tired but still relaxing, trilling like on roller coaster you are ride on and with addition of information. Even you love Modeling Users' Experiences with Interactive Systems (Studies in Computational Intelligence), you can enjoy both. It is good combination right, you still would like to miss it? What kind of hang-out type is it? Oh come on its mind hangout folks. What? Still don't understand it, oh come on its named reading friends.

Robert Cobb:

This Modeling Users' Experiences with Interactive Systems (Studies in Computational Intelligence) is great guide for you because the content that is full of information for you who have always deal with world and still have to make decision every minute. This book reveal it information accurately using great arrange word or we can state no rambling sentences inside. So if you are read this hurriedly you can have whole details in it. Doesn't mean it only gives you straight forward sentences but tricky core information with attractive delivering sentences. Having Modeling Users' Experiences with Interactive Systems (Studies in Computational Intelligence) in your hand like getting the world in your arm, info in it is not ridiculous one particular. We can say that no e-book that offer you world inside ten or fifteen small right but this publication already do that. So , it is good reading book. Hi Mr. and Mrs. hectic do you still doubt which?

Ariane Gray:

Reading a reserve make you to get more knowledge from that. You can take knowledge and information from the book. Book is prepared or printed or descriptive from each source in which filled update of news. With this modern era like currently, many ways to get information are available for an individual. From media social such as newspaper, magazines, science publication, encyclopedia, reference book, novel and comic. You can add your knowledge by that book. Do you want to spend your spare time to spread out your book? Or just searching for the Modeling Users' Experiences with Interactive Systems (Studies in

Computational Intelligence) when you necessary it?
