Neural Networks and Statistical Learning

Ke-Lin Du, M. N. S. Swamy

Neural Networks and Statistical Learning Ke-Lin Du, M. N. S. Swamy

Providing a broad but in-depth introduction to neural network and machine learning in a statistical framework, this book provides a single, comprehensive resource for study and further research. All the major popular neural network models and statistical learning approaches are covered with examples and exercises in every chapter to develop a practical working understanding of the content.

Each of the twenty-five chapters includes state-of-the-art descriptions and important research results on the respective topics. The broad coverage includes the multilayer perceptron, the Hopfield network, associative memory models, clustering models and algorithms, the radial basis function network, recurrent neural networks, principal component analysis, nonnegative matrix factorization, independent component analysis, discriminant analysis, support vector machines, kernel methods, reinforcement learning, probabilistic and Bayesian networks, data fusion and ensemble learning, fuzzy sets and logic, neurofuzzy models, hardware implementations, and some machine learning topics. Applications to biometric/bioinformatics and data mining are also included.

Focusing on the prominent accomplishments and their practical aspects, academic and technical staff, graduate students and researchers will find that this provides a solid foundation and encompassing reference for the fields of neural networks, pattern recognition, signal processing, machine learning, computational intelligence,

and data mining.

From reader reviews:

Lucia Morrone:

What do you think about book? It is just for students as they are still students or it for all people in the world, what the best subject for that? Just you can be answered for that issue above. Every person has various personality and hobby for every other. Don't to be pushed someone or something that they don't want do that. You must know how great as well as important the book Neural Networks and Statistical Learning. All type of book are you able to see on many resources. You can look for the internet methods or other social media.

Mary McDonald:

Hey guys, do you would like to finds a new book you just read? May be the book with the headline Neural Networks and Statistical Learning suitable to you? The actual book was written by famous writer in this era. Typically the book untitled Neural Networks and Statistical Learning is the main of several books this everyone read now. That book was inspired a number of people in the world. When you read this guide you will enter the new shape that you ever know just before. The author explained their concept in the simple way, therefore all of people can easily to comprehend the core of this guide. This book will give you a wide range of information about this world now. So that you can see the represented of the world in this book.

Jessica Kelly:

Often the book Neural Networks and Statistical Learning has a lot of knowledge on it. So when you check out this book you can get a lot of help. The book was authored by the very famous author. The author makes some research prior to write this book. This kind of book very easy to read you will get the point easily after reading this book.

Carlos Mendoza:

That book can make you to feel relax. This book Neural Networks and Statistical Learning was colorful and of course has pictures on the website. As we know that book Neural Networks and Statistical Learning has many kinds or style. Start from kids until teenagers. For example Naruto or Detective Conan you can read and think you are the character on there. Therefore not at all of book are make you bored, any it can make you feel happy, fun and chill out. Try to choose the best book to suit your needs and try to like reading which.
