Geoscience Research and Outreach: Schools and Public Engagement: 21 (Innovations in Science Education and Technology)

Geoscience Research and Outreach: Schools and Public Engagement: 21 (Innovations in Science Education and Technology)

From energy and water resources to natural disasters, and from changing climatic patterns to the evolution of the Earth's deep interior, geoscience research affects people's lives in many ways and on many levels. This book offers a stimulating cross-disciplinary perspective on the important relationship between geoscience research and outreach activities for schools and for the general public.

The contributors – academics, research scientists, science educators and outreach program educators – describe and evaluate outreach programs from around the world. A section entitled Field-based Approaches includes a chapter describing an initiative to engage Alaskan communities and students in research, and another on problem-based learning in the field setting. The Online Approaches section discusses ways to connect students and scientists using online forums; use of the web and social media, including the United Nations University and its experience with the design of a web magazine featuring geoscience research; and video clips on marine geoscience created by students and scientists. The section on Workshop and Laboratory-based Approaches includes a chapter on teaching geochronology to high school students, and another describing an extracurricular school activity program on meteorology. The Program Design section presents chapters on Integrating Geoscience Research in Primary and Secondary Education, on ways to bridge research with science education at the high school level, and on use of online geoscience data from the Great Lakes. The concluding section, Promoting Research-enhanced Outreach, offers chapters on Geoscience Outreach Education with the local community by a leading research-intensive university, and on the use of research to promote action in Earth science professional development for schoolteachers. *Geoscience Research and Outreach: Schools and Public Engagement* will benefit geoscience researchers who wish to promote their work beyond academia. It offers guidance to those seeking research funding from agencies, which increasingly request detailed plans for outreach activities in research proposals. Policymakers, educators and scientists working in museums, learned societies and public organizations who wish to widen participation will also find this book useful.

Together with the companion volume Geoscience Research and Education: Teaching at Universities, this book showcases the key role that geoscience research plays in a wide spectrum of educational settings.

From reader reviews:

Nicole Garner:

The event that you get from Geoscience Research and Outreach: Schools and Public Engagement: 21 (Innovations in Science Education and Technology) could be the more deep you looking the information that hide inside the words the more you get considering reading it. It doesn't mean that this book is hard to understand but Geoscience Research and Outreach: Schools and Public Engagement: 21 (Innovations in Science Education and Technology) giving you enjoyment feeling of reading. The author conveys their point in a number of way that can be understood simply by anyone who read the idea because the author of this book is well-known enough. This kind of book also makes your current vocabulary increase well. Making it easy to understand then can go with you, both in printed or e-book style are available. We suggest you for having this specific Geoscience Research and Outreach: Schools and Public Engagement: 21 (Innovations in Science Education and Technology) instantly.

Suzanne Macdougall:

Reading a book for being new life style in this 12 months; every people loves to read a book. When you examine a book you can get a lots of benefit. When you read textbooks, you can improve your knowledge, mainly because book has a lot of information in it. The information that you will get depend on what kinds of book that you have read. If you wish to get information about your analysis, you can read education books, but if you act like you want to entertain yourself you can read a fiction books, these kinds of us novel, comics, as well as soon. The Geoscience Research and Outreach: Schools and Public Engagement: 21 (Innovations in Science Education and Technology) provide you with a new experience in reading through a book.

Cathy Lantz:

This Geoscience Research and Outreach: Schools and Public Engagement: 21 (Innovations in Science Education and Technology) is new way for you who has attention to look for some information given it relief your hunger details. Getting deeper you into it getting knowledge more you know otherwise you who still having little bit of digest in reading this Geoscience Research and Outreach: Schools and Public Engagement: 21 (Innovations in Science Education and Technology) can be the light food for yourself because the information inside this book is easy to get by anyone. These books create itself in the form which is reachable by anyone, yes I mean in the e-book form. People who think that in book form make them feel tired even dizzy this e-book is the answer. So there is no in reading a publication especially this one. You can find actually looking for. It should be here for you actually. So , don't miss it! Just read this e-book sort for your better life and also knowledge.

Karen Bergeron:

That reserve can make you to feel relax. This book Geoscience Research and Outreach: Schools and Public

Engagement: 21 (Innovations in Science Education and Technology) was vibrant and of course has pictures on the website. As we know that book Geoscience Research and Outreach: Schools and Public Engagement: 21 (Innovations in Science Education and Technology) has many kinds or genre. Start from kids until teens. For example Naruto or Private eye Conan you can read and think that you are the character on there. So , not at all of book tend to be make you bored, any it offers up you feel happy, fun and chill out. Try to choose the best book for yourself and try to like reading that will.
