Regulating Chemical Risks: European and Global Challenges

Regulating Chemical Risks: European and Global Challenges

This volume presents research on current trends in chemical regulations – a fast-growing, complex, and increasingly internationalized field. The book grew out from a multidisciplinary research project entitled ‘Regulating Chemical Risks in the Baltic Sea Area: Science, Politics, and the Media’, led by Michael Gilek at Södertörn University, Sweden. This research project involved scholars and experts from natural as well as social sciences, based at Södertörn University, Swedish Royal Institute of Technology (KTH), Karolinska Institutet, and Umeå University. The project group organized a multidisciplinary research conference on chemical risk regulations, held in Stockholm, August 15–17, 2007. Most of the contributions published in this book were, in draft form, first presented at this conference. The conference, like the ensuing edited volume, expanded the geographical focus beyond the Baltic Sea area to include wider European, and to some extent also global trends. Many thanks to all project colleagues and conference participants! We are very grateful for the generous financial support received from The Foundation for Baltic and East European Studies (Östersjöstiftelsen), The Swedish Research Council Formas, and from Södertörn University. Without this support the present book would not have been possible. Special thanks to all of our fellow contributors, all of whom have submitted top-quality papers based on high-quality research. Many thanks also to Tobias Evers, who assisted us with technical editing. Finally, we are grateful for the professionalism shown by our editors at Springer.

From reader reviews:

Marie Heidelberg:

Do you have favorite book? Should you have, what is your favorite's book? E-book is very important thing for us to find out everything in the world. Each reserve has different aim or even goal; it means that book has different type. Some people really feel enjoy to spend their time to read a book. They may be reading whatever they consider because their hobby will be reading a book. Consider the person who don't like looking at a book? Sometime, person feel need book when they found difficult problem or exercise. Well, probably you will require this Regulating Chemical Risks: European and Global Challenges.

Arlene Wilson:

Reading a book can be one of a lot of activity that everyone in the world really likes. Do you like reading book therefore. There are a lot of reasons why people enjoy it. First reading a reserve will give you a lot of new data. When you read a publication you will get new information mainly because book is one of various ways to share the information or even their idea. Second, studying a book will make you actually more imaginative. When you reading through a book especially fictional book the author will bring you to definitely imagine the story how the characters do it anything. Third, it is possible to share your knowledge to other individuals. When you read this Regulating Chemical Risks: European and Global Challenges, you are able to tells your family, friends and soon about yours e-book. Your knowledge can inspire the others, make them reading a book.

Shirley Nichols:

Playing with family in a very park, coming to see the coastal world or hanging out with friends is thing that usually you could have done when you have spare time, and then why you don't try thing that really opposite from that. One particular activity that make you not sensation tired but still relaxing, trilling like on roller coaster you have been ride on and with addition details. Even you love Regulating Chemical Risks: European and Global Challenges, you can enjoy both. It is great combination right, you still wish to miss it? What kind of hang-out type is it? Oh occur its mind hangout people. What? Still don't have it, oh come on its known as reading friends.

Willie Briggs:

Reading a book to be new life style in this year; every people loves to examine a book. When you study a book you can get a lot of benefit. When you read guides, you can improve your knowledge, because book has a lot of information on it. The information that you will get depend on what kinds of book that you have read. If you wish to get information about your research, you can read education books, but if you act like you want to entertain yourself you can read a fiction books, this kind of us novel, comics, as well as soon. The Regulating Chemical Risks: European and Global Challenges provide you with new experience in examining a book.
