An Introduction to Roller Compacted Concrete Pavement

J. Paul Guyer

An Introduction to Roller Compacted Concrete Pavement J. Paul Guyer

Procedures and criteria described here are applicable to the design and construction of roller-compacted concrete (RCC) pavement (RCCP). Roller-compacted concrete pavement employs a concrete paving technology that involves laydown and compaction of a zero-slump concrete mixture using equipment similar to that used in placement and compaction of asphaltic concrete pavement. By using these construction techniques, the potential exists to save one-third or more of the cost of conventional concrete pavement. Although the concept and technology behind RCCP is relatively new, RCCP has already proven itself cost-effective in projects including log-sorting yards, port facilities, heavy equipment parking areas, tank trails, and haul roads.
