Computational Methods for Counterterrorism

Computational Methods for Counterterrorism

Computational Methods for Counterterrorism

Modern terrorist networks pose an unprecedented threat to international security. The question of how to neutralize that threat is complicated radically by their fluid, non-hierarchical structures, religious and ideological motivations, and predominantly non-territorial objectives. Governments and militaries are crafting new policies and doctrines to combat terror, but they desperately need new technologies to make these efforts effective.

This book collects a wide range of the most current computational research that addresses critical issues for countering terrorism, including:

- Finding, summarizing, and evaluating relevant information from large and changing data stores;
- Simulating and predicting enemy acts and outcomes; and
- Producing actionable intelligence by finding meaningful patterns hidden in huge amounts of noisy data.

The book's four sections describe current research on discovering relevant information buried in vast amounts of unstructured data; extracting meaningful information from digitized documents in multiple languages; analyzing graphs and networks to shed light on adversaries' goals and intentions; and developing software systems that enable analysts to model, simulate, and predict the effects of real-world conflicts.

The research described in this book is invaluable reading for governmental decision-makers designing new policies to counter terrorist threats, for members of the military, intelligence, and law enforcement communities devising counterterrorism strategies, and for researchers developing more effective methods for knowledge discovery in complicated and diverse datasets.

From reader reviews:

Matthew Siller:

Do you have favorite book? When you have, what is your favorite's book? Guide is very important thing for us to be aware of everything in the world. Each reserve has different aim or even goal; it means that e-book has different type. Some people really feel enjoy to spend their time and energy to read a book. They are really reading whatever they take because their hobby is definitely reading a book. How about the person who don't like studying a book? Sometime, man or woman feel need book after they found difficult problem as well as exercise. Well, probably you should have this Computational Methods for Counterterrorism.

Deloris Wagner:

Now a day people that Living in the era just where everything reachable by connect to the internet and the resources inside it can be true or not need people to be aware of each facts they get. How individuals to be smart in having any information nowadays? Of course the correct answer is reading a book. Looking at a book can help folks out of this uncertainty Information specifically this Computational Methods for Counterterrorism book because this book offers you rich details and knowledge. Of course the details in this book hundred per cent guarantees there is no doubt in it you may already know.

Rebecca Walton:

Spent a free time and energy to be fun activity to complete! A lot of people spent their sparetime with their family, or all their friends. Usually they performing activity like watching television, likely to beach, or picnic inside park. They actually doing same thing every week. Do you feel it? Will you something different to fill your own free time/ holiday? Might be reading a book might be option to fill your totally free time/ holiday. The first thing you ask may be what kinds of guide that you should read. If you want to attempt look for book, may be the guide untitled Computational Methods for Counterterrorism can be good book to read. May be it can be best activity to you.

Oliver Gerling:

In this period of time globalization it is important to someone to get information. The information will make professionals understand the condition of the world. The healthiness of the world makes the information much easier to share. You can find a lot of sources to get information example: internet, newspaper, book, and soon. You can see that now, a lot of publisher this print many kinds of book. The particular book that recommended to you is Computational Methods for Counterterrorism this guide consist a lot of the information of the condition of this world now. This specific book was represented how do the world has grown up. The dialect styles that writer require to explain it is easy to understand. The particular writer made some study when he makes this book. This is why this book suitable all of you.
