Centauri Dreams: Imagining and Planning Interstellar Exploration Paul Gilster

I wrote this book because I wanted to learn more about interstellar flight. Not the Star Trek notion of tearing around the Galaxy in a huge spaceship-that was obviously beyond existing technology-but a more realistic mission. In 1989 I had videotaped Voyager 2's encounter with Neptune and watched the drama of robotic exploration over and over again. I started to wonder whether we could do something similar with Alpha Centauri, the nearest star to the Sun. Everyone seemed to agree that manned flight to the stars was out of the question, if not permanently then for the indefinitely foreseeable future. But surely we could do something with robotics. And if we could figure out a theoretical way to do it, how far were we from the actual technology that would make it happen? In other words, what was the state of our interstellar technology today, those concepts and systems that might translate into a Voyager to the stars? Finding answers meant talking to people inside and outside of NASA. I was surprised to learn that there is a large literature of interstellar flight. Nobody knows for sure how to propel a spacecraft fast enough to make the interstellar crossing within a time scale that would fit the conventional idea of a mission, but there are candidate systems that are under active investigation. Some of this effort begins with small systems that we'll use near the Earth and later hope to extend to deep space missions.

From reader reviews:

Marilyn Apperson:

Spent a free time to be fun activity to accomplish! A lot of people spent their spare time with their family, or their own friends. Usually they doing activity like watching television, about to beach, or picnic from the park. They actually doing ditto every week. Do you feel it? Do you want to something different to fill your own free time/ holiday? Might be reading a book can be option to fill your cost-free time/ holiday. The first thing you will ask may be what kinds of publication that you should read. If you want to try out look for book, may be the book untitled Centauri Dreams: Imagining and Planning Interstellar Exploration can be excellent book to read. May be it might be best activity to you.

Charles Ginter:

Playing with family in a park, coming to see the sea world or hanging out with close friends is thing that usually you have done when you have spare time, in that case why you don't try matter that really opposite from that. One activity that make you not sensation tired but still relaxing, trilling like on roller coaster you are ride on and with addition of information. Even you love Centauri Dreams: Imagining and Planning Interstellar Exploration, it is possible to enjoy both. It is great combination right, you still would like to miss it? What kind of hang type is it? Oh come on its mind hangout guys. What? Still don't get it, oh come on its referred to as reading friends.

Vivian Obrien:

As we know that book is very important thing to add our understanding for everything. By a reserve we can know everything we really wish for. A book is a group of written, printed, illustrated or perhaps blank sheet. Every year has been exactly added. This reserve Centauri Dreams: Imagining and Planning Interstellar Exploration was filled with regards to science. Spend your extra time to add your knowledge about your scientific disciplines competence. Some people has several feel when they reading a new book. If you know how big benefit of a book, you can sense enjoy to read a reserve. In the modern era like today, many ways to get book that you just wanted.

David Gilbert:

Book is one of source of know-how. We can add our expertise from it. Not only for students but additionally native or citizen want book to know the up-date information of year to help year. As we know those textbooks have many advantages. Beside many of us add our knowledge, also can bring us to around the world. By book Centauri Dreams: Imagining and Planning Interstellar Exploration we can take more advantage. Don't someone to be creative people? To get creative person must choose to read a book. Only choose the best book that suitable with your aim. Don't always be doubt to change your life by this book Centauri Dreams: Imagining and Planning Interstellar Exploration. You can more pleasing than now.
