Mathematical Linguistics (Advanced Information and Knowledge Processing)

Andras Kornai

Mathematical Linguistics (Advanced Information and Knowledge Processing) Andras Kornai Mathematical Linguistics introduces the mathematical foundations of linguistics to computer scientists, engineers, and mathematicians interested in natural language processing. The book presents linguistics as a cumulative body of knowledge from the ground up: no prior knowledge of linguistics is assumed. Previous textbooks in this area concentrate on syntax and semantics - this comprehensive volume covers an extremely rich array of topics also including phonology and morphology, probabilistic approaches, complexity, learnability, and the analysis of speech and handwriting.

As the first textbook of its kind, this book is useful for those in information science (information retrieval and extraction, search engines) and in natural language technologies (speech recognition, optical character recognition, HCI). Exercises suitable for the advanced reader are included, as well as suggestions for further reading and an extensive bibliography.

From reader reviews:

Sarah Ruff:

The book Mathematical Linguistics (Advanced Information and Knowledge Processing) will bring you to the new experience of reading the book. The author style to spell out the idea is very unique. When you try to find new book you just read, this book very acceptable to you. The book Mathematical Linguistics (Advanced Information and Knowledge Processing) is much recommended to you to study. You can also get the e-book from the official web site, so you can more easily to read the book.

Mattie Martin:

This Mathematical Linguistics (Advanced Information and Knowledge Processing) is great publication for you because the content and that is full of information for you who have always deal with world and also have to make decision every minute. This specific book reveal it information accurately using great organize word or we can claim no rambling sentences in it. So if you are read the idea hurriedly you can have whole data in it. Doesn't mean it only gives you straight forward sentences but challenging core information with lovely delivering sentences. Having Mathematical Linguistics (Advanced Information and Knowledge Processing) in your hand like finding the world in your arm, data in it is not ridiculous just one. We can say that no e-book that offer you world inside ten or fifteen moment right but this publication already do that. So , this really is good reading book. Hello Mr. and Mrs. hectic do you still doubt in which?

Sylvia Alexander:

With this era which is the greater individual or who has ability to do something more are more special than other. Do you want to become one among it? It is just simple solution to have that. What you are related is just spending your time not very much but quite enough to get a look at some books. Among the books in the top listing in your reading list is Mathematical Linguistics (Advanced Information and Knowledge Processing). This book which is qualified as The Hungry Hills can get you closer in turning out to be precious person. By looking up and review this e-book you can get many advantages.

Heather Garcia:

You can get this Mathematical Linguistics (Advanced Information and Knowledge Processing) by look at the bookstore or Mall. Simply viewing or reviewing it could possibly to be your solve problem if you get difficulties on your knowledge. Kinds of this reserve are various. Not only by written or printed but also can you enjoy this book by e-book. In the modern era similar to now, you just looking by your mobile phone and searching what their problem. Right now, choose your own personal ways to get more information about your publication. It is most important to arrange you to ultimately make your knowledge are still up-date. Let's try to choose suitable ways for you.
